

M1. MUSIC SESSION 1**M1.7 Te Hao***Nebula II*

In astronomy, "nebula" is a cloud of gas or dust in outer space, visible in the night sky as an indistinct bright patch or a dark silhouette against other luminous matter. I was particularly inspired by the dark silhouette that are manifest clearly in different images photographed. As such, I originally composed this work.

Duration: 4' 48"

Year of Composition: 2019

Te Hao, composer, born in Inner Mongolia, China. He is doctoral student in Musashino Academia Musicae, Tokyo, Japan, majoring in composition for electroacoustic & instrumental music.
